# SCHEDULING

Mono Scheduling enables SMBs to accept online bookings on their website with unlimited access to all features, calendars and staff members.

NO LIMITS

Mono Scheduling includes unlimited access to the most used features needed by small business owners such as calendar, automatic booking approval, automatic reminders and a website booking wizard. Customers can add an unlimited number of staff members, services, clients, bookings and email reminders for ultimate flexibility and growth opportunities.
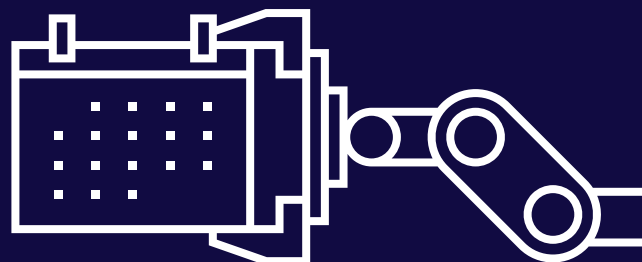

CUSTOMIZABLE WIZARD

Business owners can choose to show all available services and staff members or display them individually in the booking wizard. It is also possible to trigger an automatic selection of staff and services depending on the users' choice of date and time slot. The wizard design can easily be styled in Global Design. For websites built on the Mono Platform, the booking wizard flow can be set to automatically inherit the existing website design, saving production time and ensuring a consistent look-and-feel.

EASY EXTERNAL EMBED

Easily embed the Mono Scheduling wizard on any website or platform regardless of the software provider e.g. any open source CMS or a Facebook business page. The set up of Mono Scheduling and appointment management will be done through the Mono Platform.

MONO

FEATURES

Mono Scheduling includes
the following features:

- Online booking wizard with configurable steps and flexible styling options
- Appointment calendar with color differentiation for each staff member
- Manual or automatic approval of appointments
- Calendar filtering options to limit view to certain staff or services
- Calendar synchronization
- Staff and services management
- Easy booking management

- Multi-currency support
- Email notifications and reminders
- SMS reminders (paid service)
- Full and unlimited access to all features included in the subscription
- Embed Mono Scheduling on any site
- Manage Mono Scheduling from any device
- Dashboard with relevant statistics

HOW IT WORKS

From spending less time answering phone calls and emails to more time spent doing what they do best, Mono Scheduling ultimately saves small business owners time and can help them generate more revenue. It is a highly affordable solution with no feature limitations that makes online booking feasible for even the smallest startups with low start capital - regardless of their chosen website provider. The staff can access the booking administration from any device and manually add, edit and delete bookings at any time.

Once enabled on a website, Mono Scheduling can be accessed directly from the Mono Platform.
