

MONO AND LEADS BY ME

QUALIFIED LEADS NEAR YOU

Quickly find and identify potential
small business customers

Leads By Me.

LOCATE RELEVANT SMBs

The integration between LeadsByMe and Mono gives digital service providers a unique sales tool to help locate, convert and create an online presence for local businesses.

LOCAL LEADS

LeadsByMe reduces the time needed to find qualified prospects, and uses key digital insights to find nearby businesses that need an updated online presence. With a clear overview of prospective clients, sales teams can more efficiently plan their sales route.

TAILORED APPROACH

Knowing how to adjust your sales pitch for a specific SMB can be difficult. With LeadsByMe, you can target SMBs within specific parameters, such as a non-responsive website or a rich social media page, and tailor your sales approach to their existing online presence.

INSTANT PREVIEW

Using available business data, sales teams can instantly generate a website preview using the Mono One-Click Site solution. By giving a live demo, small businesses can see how quickly and easily they can get a professional and data-rich website.

CUSTOMER JOURNEY

From a customer database to e-commerce, SMBs need to grow over time. Data-driven websites built on the Mono Platform support the entire customer journey, and SMBs can simply add more functionality as their business requires.
