

MONO AND SILKTIDE

PERFECT YOUR SMBs ONLINE PRESENCE

Empower your team to consistently deliver
high-quality websites

INTELLIGENT QUALITY ASSURANCE

Consistently building high-quality websites is a real challenge. With Mono and Silktide, you can deliver a perfect website every single time.

IMPROVED PRODUCTION

Silktide is a quality assurance tool that gives your fulfillment team the ability to independently review and manage website quality. This minimizes time and resources spent on costly re-works, and enables you to offer a service-level agreement (SLA) to assure consistent quality.

HAPPY CUSTOMERS

Empowering your team with a powerful technology solution ensures the consistency of quality of your websites and helps keep your customer base. In the long-run, this can improve your net promoter score (NPS) and strengthen new customer acquisition.

SOLVE COMMON CHALLENGES

Identify the common challenges your team faces when building websites, and use this knowledge to better train your fulfillment team, and equip them with best practice guidelines on how to avoid and solve recurring production challenges.

BETTER DESIGN

With Silktide to safeguard website quality, your fulfillment team can focus on using more advanced design features in the Mono Site Editor to customize and make your SMB customers' websites truly unique.
